Moving Tips in Rainy Weather

We all know that April is one of the Rainiest month of the year, and with it comes Beauty and the excitement that warm weather is just around the corner

But in the storage business we need our customers to keep in mind that it is also one of the most important Months to protect your items while in transport When items get wet/damp and you place them in a dry warm unit with no circulation in it they will become white with mold spurs, warped & invite mice [damp wicker basket are a source of food for them]. So here are some tips to help protect your belongs while in storage. Bring along some dry towels to wipe items off, moving/regular blankets, throw rugs, old sheets to cover your dried items. Plastic is not recommended to use when items have gotten damp, that will cause condensation. For more helpful tips ask our storage rental experts in the office.
